Newsletter No.175

Hi to everyone,

Officially the silly season is upon us – harvest has commenced. The weather is perfect – warming up nicely but not too hot. The low to mid 30's with little to no wind is close to perfection for late spring. The race to Christmas is now on with less than 6 weeks until the 25th December the pressure starts to mount.

A big thank you to all those who supported our effort for the McGrath Foundation Barbecue, especially to the Berrigan Lions Club Members that cooked the food, a total of \$643.75 was raised and directly deposited to the foundation. Just to make sure that everyone is very clear, when Dawmac runs a fundraiser such as the McGrath Foundation Barbecue Lunch every cent donated or money paid for food or drink goes to the foundation. Dawmac pays for all of the expenses, the cost of the food, the advertising and the staff to make the event happen.

Talking about unique – remember the Berrigan Pool is free to everyone. This comes about through the hard work of the committee and donations by various individuals. Please continue to make use of this well-kept, well presented facility.

Berrigan's first mural is taking shape – looks great!

Hopefully the first of more to come?

Remember 'Berrigan Night Market' Friday 1st December 2017 - see you there!

Cheers and good health

John P Lane

14 Chanter Street , Berrigan, NSW 2712

yasminK@dawmac.com.au

HARVEST—NOW YOUR CROP = YOUR DECISION

This years harvesters may hear a Harvest Safety Alert being issued for their district, this replaces the Cease Harvests that were previously issued by the NSW RFS. The Grain Harvesting Guide enables farmers to measure their local weather conditions and determine if they could continue or should delay harvesting operations due to fire risks.

GRAIN HARVESTING AND FIRE SAFETY

Is the wind speed too high for me to harvest right now?

1 Measure the current temperature, humidity and wind speed on your property. Average out the wind speed over 10 minutes and round down humidity readings.

2 Using your temperature and humidity readings, find the maximum recommended wind speed in the table. For example a temperature of 40° and 15% humidity equals 26 kph.

3 If the wind speed you've recorded is equal to or greater than the wind speed in the table, it is recommended you do not harvest. Reassess weather conditions later.

Produced in partnership with the
NSW Rural Fire Service, NSW Farmers and
Australian Custom Harvesters

		Current Relative Humidity										Average wind speed (kph) that equates to 35 GFDL
		5%	10%	15%	20%	25%	30%	40%	50%	60%	65%	
Current Temperature	15°C	31	35	38	40	43	45	49	53	56	58	
	20°C	29	33	36	38	40	43	46	50	53	55	
	25°C	27	30	33	36	38	40	44	47	50	52	
	30°C	25	28	31	33	35	37	41	44	47	49	
	35°C	23	26	28	31	33	35	38	41	44	46	
	40°C	21	24	26	28	30	32	35	39	41	43	
	45°C	19	22	24	26	28	30	33	36	39	40	
Is the wind speed you recorded equal to or greater than the wind speed shown above? If yes, it is recommended you do not harvest. Check weather conditions later.
