## Newsletter No.187

Hi everyone,

Welcome to the big dry. Everyone will be impacted by the economic downturn of reduced agricultural activity. How will Berrigan fair as a business center? Now is the time for everyone to be very mindful about how and where you spend your money. Businesses in Berrigan, Finley and Jerilderie (our smaller communities) are already under pressure from the big multi nationals—Woolworths, Bunnings and the Internet. At times like these it is imperative that we all work together as a united region to keep the business retailers and service providers that we already have. History has shown that once a business closes then there is only a 20% chance that a new business will start in its place. As customers (purchasers) we have over the years become very selective, harder to please. Our reasons for shopping out of town are varied and many—price, quality, a day out, choice, variety, the list goes on. What we all need to realise is our local businesses help underpin the viability of our communities—that the price of real estate (your house) is effected by the economic activity of your community. Please think before you shop out of town, give your local business a try, maybe be prepared to pay a little more for the convenience of shopping local. Perhaps you may need to change brand of product—try an alternative offered? Making a profit is not a dirty world, profit is what pays the wages, rates, insurance and helps support our communities. Business is a two way street, businesses need to also try harder, perhaps listen more, ask more questions. There is a lot of transparency associated with running a business in a small community, that helps keep us honest. Need a day out? Perhaps its time you visited another small community town. Explore what is local, you may find something new and feel good that you are supporting fellow business operators. Till the next newsletter, travel safely.

*Cheers and Good Health—John P Lane (Managing Director)*
